After the highly successful evolution of the online teaching- learning process nationwide, examinations were to be conducted online as per the UGC guidelines. The huge advancements in computer- based testing has now redefined the possibilities of assessment, particularly in terms of what can tested, how and when. These advancements mean that there are many more applications for both summative and formative testing, applications that were unthinkable even a couple of years ago. This required upgrading the evaluation skills of the teaching faculties to suit the changing mode of the teaching - learning process with time and circumstances.*
